## ■ Activity of Institute

- 2012.01.03 Selection as Candidate Journal of Accredited National Research Foundation of Korea
- 2012.01.31 Conducting Equipment Training against Crude Fiber Analyzer (Foss Fibertec 2010)
- 2012.01.31 Opening of Institute Director Meeting of Kangwon National University

## ■ Published Research Papers

NAME	TITLE
Prof. Choon-Keun Park	Changes in Plasminogen Activity in Uterus Tissue during the Estrous Cycle in the Pigs. <i>Reprod. Dev. Biol.</i> 35(4):463-468
Prof. J. D. Lohakare	Effects of limited concentrate feeding on growth and blood and serum variables, and on digestibility and gene expression of hepatic gluconeogenic enzymes in dairy calves. <i>J. Anim. Phy. Anim. Nutr.</i> 96(1):25-36
Prof. J. D. Lohakare	Metabolic effects of short-term administration of fluoride to calves fed graded protein levels in their diets. <i>Fluoride.</i> 42(2):95-102
Prof. J. D. Lohakare	Comparison of growth performance, nutrient digestibility, blood metabolites and carcass traits in Korean native and crossbred weaning piglets. <i>Animal Nutrition and Feed Technology.</i> 11(2):159-167

## ■ Activity of Researchers

### ✓ Prof. Young Han Song

- 2012.01.13 Research service progress report about methodology establishing college of animal husbandry at Hoengseong
- 2012.01.26~02.05 Visiting Sudan as a local specialist of IIRD project

### ✓ Prof. Sang Jip Ohh

2012.01.23~02.01 Presentation in International Forum of Poultry Science, Atlanta, USA

- Effect of dietary metabolizable energy (ME) levels on growth performance of both male and female Korean native chicken
- Effect of dietary  $\beta$ -mannanase and palm kernel meal (PKM) on laying performance and egg quality of older laying hen
